

Sage Taxation 2011

Sage Instant Taxation 2011

Released March 2011

Changes for a compliant system

The new, updated Sage Taxation 2011 and Sage Instant Taxation 2011 software are available to download from 5 April 2011 in time for the start of the new tax year. The below changes have been made to ensure that Sage Taxation customers have a compliant system for the 2011 tax return; and to enable you to prepare, produce and file those returns more easily.

- The 2011 versions of the SA100, SA800 and SA900 returns and supplementary pages have been added along with updated versions of forms R40, P11D and SA303
- HMRC-approved online filing for the 2011 tax year for the SA100, SA800 and SA900 forms is included, along with updated HMRC validation rules and their special and excluded cases, to help you make successful submissions
- The tax computation for individuals has been updated to include rules for the tax year ending 5 April 2011
- Sage Taxation 2011 includes form SA951, which calculates the tax liability for trusts
- Improvements to Business Tax include enhancements and simplification of the User Interface, resolution of calculation errors and improved data exchange with Personal and Partnership Tax
- Updated rates, allowances, thresholds and calculations for the applicable income for individuals including car and fuel benefit, living accommodation benefit, self-employment and partnership turnover have been included
- Certified to work on the latest 64 bit operating systems
- For subscribers to the Securities Database, there will also be an update to include details of dividends paid from companies on the London Stock Exchange up to the end of February. A further update will be made available in early summer to provide dividend details up to 5 April 2010
- Enhancements to Capital Allowances functionality and usability
